C-STEM Academy

C-STEM Academy on Integrating Robotics into Math, CS, and STEAM Education for K-12 Teachers

The C-STEM academy is designed to provide K-12 teachers with the knowledge and experience necessary to incorporate hands-on and interactive activities in their daily classroom curriculum. This session will guide teachers through supporting their students as they are learning math, art, music, and science by demonstrating concepts and ideas through coding and robotics examples using RoboBlockly, a user-friendly web-based coding and robotics environment.

This academy is open to any K-12 teachers. No prior experience is necessary! All teachers who attend the C-STEM Academy will have FREE access to the Roboblockly K-12 Mathematics with Robotics prime curriculum, CS/STEAM with Robotics prime curriculum, and teaching resources through June 30, 2022.

Cost: \$500
